

NestID: P9N1-23	Species: Bobolink	Location: S/W Plot 9, GP4	Date Found: Mo/day/yr 6-9-23
Nest Substrate (Grass species, height, stage): Grass, All flower			Nest height: Ground 0 Nest Orientation:
NEST FATE CODES		NEST SUMMARY	LOCATION DESCRIPTION:
1 = Successful 2 = Cause of failure except brood parasitism 2.0 = Cause unknown; 2.1 = Abandon before eggs laid 2.2 = Abandoned after eggs laid; 2.3 = Depredated 2.4 = Adult mortality; 2.5 = Research Activities 2.6 = Weather; 2.7 = Act of God (fallen tree, etc.) 3 = Brood parasitisms 3.0 = Host eggs abandoned 3.1 = Host young failed; cowbird alive 3.2 = Fate of host offspring unknown, cowbirds alive 4 = Status Unknown 4.0 = nest found, but never observed active 4.1 = nest occupied, but insufficient to determine fate 4.2 = nest occupied, but monitoring discontinued		Summary Dates: Clutch Complete -> Hatch Date -> Fledge/Fail Date -> NEST OUTCOME: Search Method -> Nest Fate -> # Fledged -> GPS?	Snake ~ 10-12m down from path. No shrub in tallest grass but not where hole was. COMMENTS:

Search methods: systematic, observation, luck, stick. Any evidence for fledglings (circle)? Flattened nest-rim/feces in or close to nest/ feather sheaths in nest/parents with food/saw fledgling/continuous chipping/other (describe). _____ Weather in the last 24h? ____ Are any unhatched eggs left? ____ How many? ____ Are those eggs host or cowbird eggs? ____
